

**Friday 28 November 2014**

**DVD running order – 09:15 – 09:55 (timings subject to review)**

1. Completion laparoscopic cholecystectomy for recurrent symptomatic cholelithiasis.
2. Laparoscopic Repair of a Morgagni Hernia
3. Laparoscopic Splenic Artery Aneurysm Ligation with Splenic Preservation
4. Laparoscopic TEP Inguinal Hernia Repair Using A Self Fixating Mesh - A New Technique
5. Laparoscopic reversal of Roux-en-Y gastric bypass with concomitant sleeve gastrectomy

**Free Paper Presentations – Morning session (timings subject to review)**

1. Is laparoscopic colorectal cancer surgery feasible for elderly patients with high performance status? A multi-centre large cohort study.
2. Case-controlled analysis of short-term outcomes after laparoscopic and open minor resection for solitary liver tumours
3. Laparoscopic Cholecystectomy Telementoring in a Less Developed Country: A 10 Year Experience with 324 Cases Performed
4. Validation of 3-D (dimensional) models for training in laparoscopic surgery based on MISTELS for training and evaluation of laparoscopic skills
5. Oesophageal motility is unrelated to outcome following laparoscopic 360 degree fundoplication
6. Single-port Access (SPA) Laparoscopic Reversal of Hartmann Operation

**Free Paper Presentations – Afternoon session (timings subject to review)**

1. Factors predicting 30 days re-admission after laparoscopic colorectal cancer surgery within enhanced recovery
2. Mesh Fixation vs. Non-Fixation in Total Extra Peritoneal (TEP) Mesh Hernioplasty
3. The perfect substitute for simulated laparoscopic appendicectomy
4. How safe is elective splenectomy in the laparoscopic era?
5. Biliary drainage post laparoscopic ductal explorations: complications and strategies for prevention.
