Registration

1. Please go to the link below and pre-register yourself for the webinar

www.depuysynthesetraining.com/webinar

2. If you will be using a mobile device, download the free mobile application Adobe® Connect™. Please turn off your private mode browsing feature.

3. Once you have fully registered, you can enter the room via the link sent to you or by opening the link in the application.

Registration will be active about 1 h prior to the event.

For additional information please contact your Ethicon representatives.

Overview

Laparoscopic surgery has become well established in the management of both benign as malignant colorectal disease. This interactive webinar will discuss laparoscopy in emergency colorectal surgery. The speakers will review critical components such as patient selection, technical requirements, risk factors, perioperative management including the multidisciplinary team, complications and rescue strategies.

Audience

General surgeons and GE surgeons with specific interest in laparoscopy and emergency procedures of colorectal cancer. The webinar is also recommended for multidisciplinary teams (for example an anesthesiologist, (OR) nurse, etc.). Participants should have experience in standard colorectal cancer procedures.

Speakers

Mr. Tan Arulampalam trained as a surgeon in London and Rome and was appointed Consultant Surgeon at Colchester General Hospital in 2003.

As Clinical Director of the ICENI Centre, Mr Arulampalam has taken an active role in training as a National Laparoscopic Colorectal Trainer and being on the faculty at the European Surgical Institute, medical advisor to the charity Beating Bowel Cancer and working on Department of Health projects.
