

One-Stage Cholecystectomy and Laparoscopic Bile Duct Exploration Pathway Program

Ethicon

May

Virtual – Zoom

July

F2F – The Griffin Institute, Northwick Park

This program will award CPD points

Welcome to the Johnson & Johnson Institute

This program is an opportunity to advance learning of the novel one-stage surgical pathway for treating complicated gallstones with laparoscopic cholecystectomy plus minus bile duct exploration. It will comprise four 45-minute live and interactive virtual sessions and a F2F course using innovative surgical models.

We have designed this program to deepen your knowledge of procedure justification, patient selection, equipment, materials and surgical techniques. There will also be opportunity to cover your specific questions and learning objectives and we will provide access to the Surgical Process Institute (SPI) system pre-program.

The virtual program is targeted at HPB/UGI/General surgeons – from trainees to experienced consultants. The F2F course is upon application from HPB/UGI/General post CCT trainees/fellows/newly appointed consultants. More details below.

I wish you a very instructive course.

Yours Sincerely,

Hannah Cutting

Professional Education Manager

Johnson & Johnson Institute

hcutting@its.jni.com

Faculty

Alberto Martinez-Isla
Consultant UpperGI
Surgeon (LNWUH)
Course Director

Matyas Fehervari
Surgical Registrar (North
West Thames)

Lalin Navaratne
Surgical Registrar
(North West Thames
and Defence Services)

Dr Ismail Badr
Director of Radiation
Protection (St Georges)

Virtual Program

Virtual Session 1: Background & Justification for Single Stage Approach

Weds 5th May
17:30-18:15

- History of bile duct exploration
- Advantages of single stage treatment over the traditional pre-operative ERCP + laparoscopic cholecystectomy for management of CBD stones

Virtual Session 2: Clinical Use of Lithotripsy & Energy

Weds 12th May
17:30-18:15

- LABEL: Laparoscopic Bile Duct Exploration by Laparoendoscopy: Principles and Technique
- Pre-LABEL: Factors predicting the use of lithotripsy during LBDE
- Clinical Cases (Interactive)

Virtual Session 3: Laser Lithotripsy: Principles and Safety

Weds 19th May
17:30-18:15

- **Delivered by Dr Ismail Badr**
- Introduction to Holmium YAG Laser
- General principles and safety of laser

Virtual Session 4: Introduction to Surgical Techniques

Weds 26th May
17:30-18:15

- Transcystic bile duct exploration
- Transductal bile duct exploration
 - Primary closure
 - Closure over T tube
 - Closure over anterograde stent
 - Closure and transcystic drain
- Different scenarios that can be found in LBDE
- Advance and instructions for the practical session

F2F Course

Date: Friday 9th July

Location: The Griffin Institute, Northwick Park

Capacity: 12 delegates (post CCT/fellow/junior consultant)

To apply: please send your CV, a covering letter and brief supervisor letter to hcutting@its.jnj.com by 14th May. Successful applicants will be notified on 21st May.

9:00 Welcome, Introduction, Course Learning Objectives

9:20 Practical Session using novel PARA surgical models

10:40 COFFEE BREAK

11:00 Ethicon Surgical Instrumentation Demonstration

11:20 Practical Session using novel PARA surgical models

13:00 Close, Reflections and Feedback
