08:00 – 08:25 VERSIUS & THE DIGITAL DATAVERSE
The Stage, Main Auditorium, Ground Floor

Mr Mark Slack, CMO of CMR
Chairs: Mr Andrew Day (Redhill); Mr Simon Higgs (Gloucester)

Digital data, its use and ownership, is increasingly important in the care we deliver to our patients. With the growing evolution of advanced technologies and robotics in surgery, vast terabytes of data are being created and stored. During this breakfast session, Mark Slack, the co-founder and CMO of CMR will talk about how data can help us learn more about the care that we are giving but most importantly improve outcomes for patients.

08:30 – 08:55 WHAT'S YOUR THEME TUNE?
The Lens Studio, Ground Floor

Mr Chris Turner, Consultant in Emergency Medicine, Tertiary Trauma Centre, Coventry
Chairs: Professor Tan Arulampalam (Colchester); Mrs Debbie Gooch (Colchester)

Performance, wellbeing and burnout are inextricably linked in our working lives. We as surgeons and nurses work in complex systems with dynamic and challenging demands. Measuring success can be viewed from the patient's, clinician's and the organisation's/system's perspective. The invisible glue that binds a team of clinicians and allows success is often not seen and never measured when errors or mistakes happen. This breakfast meeting explores the underrated aspects of how we perform at our best and brings alive the concept of civility in our workplace. This breakfast meeting explores the unsaid, the unwritten and the essentials.
